

This month

Jan 16 - Night classes start

Jan 17 - Day classes start

Jan 17 - MLK Jr. Day
convocation @ 11am in chapel

Jan 24 - BioTables @ 2pm in
BeeHive

Jan 31 - BioTables @ 2pm in
BeeHive

Coming up

Biology Club - Every other
Thursday @ 11am in the 4th
floor lounge starting Feb 2nd

EcoStewards - Every other
Thursday at 6pm in Stewart
406 (activities on alternate
weeks!)

Research Symposium - April
26 (abstracts due in March)

Service days, activities,
trips, etc. Keep an eye out
for club emails!

HSC307 Functional Anatomy Fall Projects

HSC307 Functional Anatomy students were busy being creative this semester. The students were assigned an *Anatomy Model Project* which presented students with the ability to create a 3-dimensional model to illustrate significance in human function. [Congratulations](#) to **Joseph Kraft**, Health & Exercise junior, who created the 'competent' model as voted by his classmates.

Exercise Science and Athletic Training service project

The Health & Exercise Science Program faculty and students along with the Master of Science, Athletic Training, students, and staff felt the 'season of giving' would be a wonderful opportunity to gather and give back to our community. The Center for Service Leadership provided us with the materials to support *Project Linus*, a non-profit organization which provides homemade 'no sew' blankets to children in need.

Join a club

Get involved this semester! Spring semester is a great time to add in a club or service project to your schedule. Clubs help you meet people, do and learn fun things, and leadership in clubs looks great on resumes.

Tutors needed

We could use more tutors for Bio 121/122, especially ones that can tutor at times when our athletes are available.

If anyone has taken Physics 201 or 202 - ask about being a tutor!

Summer plans

This is a great time to find your summer plans. Look for internships, research experiences, shadowing opportunities, etc. Contact places you are interested in or apply early. Ask your advisor to look at your application material and let any reference writers know as soon as possible so they have time to prepare a great recommendation.

Stocking Trout in Ten Mile River

Environmental science student **Tyler Metzger** and **Dr. Hayes**, participated in helping stock Rainbow Trout and Golden Trout in the 10 mile river as volunteers with the Isaac Walton League Harry Enstrom Chapter to stock fish in Jefferson on November 13. The group of around 18-20 volunteers stocked 450-480 trout.

January Service trip - Florida

A group of eight students from the Biology department (and one from business) led by **Drs. Hayes and Mendoza**, worked with international conservation organization A Rocha, an international Christian conservation organization (<https://arocha.org/en/>), to conduct plastic pollution surveys and biodiversity assessments in Titusville, Florida from January 7-14, 2023.

Happy Spring Semester!
